

# BLAKE MASON

Business and Technology Specialist

## HELLO

I help provide solutions to business operations using technology. Whatever the need, I strive to find the optimal solution in a world where modern technology is constantly changing and moving forward. Whether automating routine tasks, optimizing reporting, or even helping a coworker with their temperamental printer, I love helping people navigate the complex environment of technology in which we live.

## SKILLS

## COVER LETTER

Dear Hiring Manager,

I am interested in obtaining full-time employment as a Demo Engineer at Procore. I believe my dependable, personable, and professional nature makes me a competitive candidate for this position. My (a) experience at U.S. Wheel Corporation and (b) education at BYU, UCI, and Hack Reactor have provided me with the skills necessary to succeed at this job.

**Experience.** As a Business and Technology Specialist at U.S. Wheel Corp, I specialized in identifying business problems, and providing tech solutions. I worked closely with all business teams to optimize current processes, improve systems, and resolve issues. Some examples of work I did are automating order entries for U-Haul and Summit Racing orders, setting up a SQL database to track drop ship orders, and generating bill of materials for the wheel assembly process.

**Education.** Through my software engineering programs at UCI and Hack Reactor, I have enhanced my ability to think sharply and quickly by practicing complicated logic with JavaScript-centered technologies. I have also learned how to build, manage, and operate MySQL, PostgreSQL, and MongoDB databases. I apply this knowledge in business settings to provide simple technology solutions to complicated business problems. My degree in business from BYU coupled with my certificates from UCI and Hack Reactor give me a powerful toolset that I feel would help me thrive as a Demo Engineer.

I am confident my skills as a Demo Engineer will be valuable to Procore, and I would like to further discuss my qualifications. Please feel free to contact me by email at blakelmason@gmail.com or by phone at (714) 878-5117.

Sincerely,

Blake Mason
